Hello,

The following submission has been created.

Track Name: ICSCC2023

Paper ID: 305

Paper Title: SENTIMENT ANALYSIS OF IMDB MOVIE REVIEWS

Abstract:

The interpretation and classification of emotions in text data via textual analysis techniques is commonly referred to as sentiment analysis. Not only polarity positive, negative, or neutral, but sentiment and emotions, as well as intentions, such as interested v. not interested, are taken into account by sentiment analysis models. Large businesses invest considerable amounts in predicting the outcome of their activities.

In the field of marketing, customer support and clinical medicine sentiment analysis is often applied. It is intended to give voice to customer materials, such as feedback and survey results, information on the Internet and Social Media in addition to Health Information. Now, thanks to the development of deep language models like ROBERTa, these data sets can be analyzed in greater detail, for example news stories where authors often express their opinions and feelings without explicitly expressing them.
